SMALL GROUP GUIDELINES
GROUPS BY REGION:
Facilitating EBP in the Context of Cultural Competence

NOTE_1: You may wish to make sure that each regional group has its own note taker as well as the person already identified by the Conveners. This will ensure redundancy and allow you to very quickly have a copy of your own regional specific notes.

NOTE_2: Each group may also include members at large to serve as potential resources and discussants.

Based on your own prior experiences and the discussions so far today,

1. Spend 15 minutes crafting simple statements or sentences that reflect your current level of achievement with respect to developing and implementing culturally competent evidence based practice. Provide at least one example for each statement.

2. Identify pragmatic goals that would follow up on your current achievements.

3. Prioritize the goals identified in Question 2, above.

4. What are the steps for achieving these goals upon returning home (other than a well-deserved vacation)?
