The University of Minnesota Graduate School requires that all entering students receive a program handbook. This handbook is designed to provide information about the master’s and doctoral programs and to be a guide to the student’s degree plan. Also included are websites that provide up-to-date information about policies and procedures. Students are responsible for knowing and following the procedures and rules in the Graduate School Catalog at http://www.grad.umn.edu/students/

The University of Minnesota uses email as its official means of distributing information to the University community. The Department of Family Social Science (FSoS) will send students emails to alert them to information on policies and program matters.

While navigating through the FSoS graduate program, students may feel free to ask questions of the following individuals: their adviser, the Director of Graduate Studies (DGS), the program director of Couple and Family Therapy (CFT), the program director of Parent and Family Education, the Graduate Student Personnel Coordinator, and fellow students. Again, welcome to the graduate program in Family Social Science!

Handbook revised July 2014
## CONTENTS

### MISSION AND GOALS

- Overview of Graduate Program

### OVERVIEW OF GRADUATE PROGRAM

- Learning Environment, Student Backgrounds, and Student Opportunities
- Family Social Science Graduate Programs

### ACADEMIC ADVISING

- Advising
- Assigning/Changing an Adviser and/or Committee Members
- Graduate Degree Plan
- Course Substitutions

### MASTER’S DEGREE PROGRAMS

- Master’s Degree Plan A (with thesis) Requirements
- Final Steps for the Plan A

MISSION AND GOALS

The Department of Family Social Science’s mission is to enhance the well-being of diverse families in a changing world through teaching, research, and outreach. This understanding can ultimately lead to the development of strong families and to the enhancement of family functioning for future generations. The mission of Family Social Science is implemented through the interdependent activities of teaching, research, and outreach.

The goals of graduate education in Family Social Science involve assisting students in (a) integrating family theory, research, and practice; (b) producing family research; (c) developing teaching scholarship; and (d) demonstrating competencies in substantive areas of family social science.

Students receiving graduate degrees in Family Social Science are expected to have a broad knowledge of family science, to be able to engage in independent research related to families, and to be specialized in areas of application to human problems and issues for families and society.

To meet these goals, students can seek opportunities to participate in the following activities:

- Coursework in Family Social Science and related fields
- Coursework in statistics and research methods
- Supervised research
- Supervised teaching
- Cooperative writing opportunities
- Field experiences
- Independent/Directed study opportunities
- Work with several departmental faculty
- Professional development
- Interaction with other students

OVERVIEW OF GRADUATE PROGRAM

Family Social Science is a multidisciplinary department offering a unique opportunity for an integrated program of study at the master’s and doctoral levels, using the knowledge and methods of social science to examine family systems and their interactions with various environments. Faculty members are committed to research and the application of knowledge for the enhancement of individual and family life. Their activities encompass a wide range of social, economic, and political issues that affect families locally, nationally, and internationally. The program’s goals are accomplished by:

- Teaching individuals to serve as researchers, theorists, educators, therapists, consultants, and/or administrators.
- Conducting research to improve understanding of family processes and development over the life span, as well as to further understanding of the interaction of individuals and families with their external environments.
- Disseminating research-based information at state, regional, national, and international locations for scholars, professionals, policymakers, and the general public.
- Involving students in engagement and professional activities.
Learning Environment, Student Backgrounds, and Student Opportunities

The University of Minnesota’s graduate program in Family Social Science has been identified as a leader in the nation. FSSoS graduate students contribute to a rich learning environment through the varied personal and professional experiences they bring to the program. Professional backgrounds of recent students include therapist, lobbyist, teacher, researcher, center director, parent, minister, program manager, program evaluator, nurse, and hospital chaplain.

The diversity of students’ backgrounds in ethnicity, sexual orientation, and national origin also adds a multifaceted understanding of intergenerational families. International students in the program have come from Barbados, Brazil, Chile, China, Germany, Hong Kong, India, Israel, Japan, Korea, Malaysia, Mexico, Russia, Singapore, South Africa, Swaziland, Serbia, Taiwan, Turkey, and Vietnam.

The program is designed to have extensive student-faculty collaboration. Students are also encouraged to support each other’s progress through formal and informal mechanisms. During the program, students frequently have opportunities to present papers at professional conferences, contribute to co-authored publications, teach undergraduates, develop online materials based on their research and/or teaching experience, and develop materials for community outreach. Many times these are co-authored with a faculty member.

Family Social Science Graduate Programs

Graduate students in Family Social Science may seek a master’s degree with thesis (Plan A), a master’s degree without thesis (Plan B), a master’s degree in Family Education (Plan C), or a doctoral degree. Admission to the COAMFTE-accredited Couple and Family Therapy specialization is available only to doctoral students with a clinical master’s degree (e.g., Couple/Marriage and Family Therapy, social work, psychology, counseling, psychiatric nursing) or to those who have achieved equivalent clinical experiences as determined by the Couple and Family Therapy (CFT) faculty.

ACADEMIC ADVISING

One of the great strengths of our program is that students work closely with faculty mentors and advisers. Family Social Science supports this student-faculty relationship in many ways including advising, Orientation Seminar for Family Social Science, FSSoS Colloquium, and other group meetings. The student-faculty relationship and the student-to-student connection is supported by the manner in which the program is introduced and the activities that students choose to be involved with during their time in the graduate program.

The program requires a great deal of writing and research by students, and faculty members are available to develop and improve the conceptualization, organization, and other aspects of their projects. One indication that the process works is that students and recent graduates of this program have won a number of national awards for their work.

Of course, not all advising and mentoring is about writing and research; faculty help with other issues that arise during a student’s time in the department – including making choices about which courses to take, renewing motivation, developing as a teacher or therapist or other kind of professional, and finding the best employment niche. We highly encourage student-faculty interaction.
Advising

Students are assigned an adviser to guide their program prior to matriculation. During FSoS 8200 Orientation for Family Social Science, offered fall semester, students work together to meet one of their goals as first-year students: to get to know faculty members in the department. Students are encouraged to schedule follow-up conversations to get better acquainted, especially if a student has an interest in having a particular faculty member on the examination committee.

- **Master’s Degree Plan A and Plan B:** At the end of the first year, master’s degree students will designate two members of the graduate faculty to serve as the inside members of the examination committee, one as adviser. The examination committee is comprised of two FSoS committee members along with one member from outside the major. The student needs to complete the departmental form, Designation of Departmental Committee Members (M.A.) available at http://www.cehd.umn.edu/fsos/current/forms.asp, and submit to the Graduate Student Personnel Coordinator for filing.

- **Master’s Degree Plan C:** Master’s Plan C students are encouraged to set up a time to meet with assigned advisers before beginning, and no later than, the first semester of classes. Students can contact advisers by email and arrange meetings to take place in person on the St. Paul campus or virtually - via phone or Skype/Google Hangout. At the end of the student’s program two faculty members will serve as the student’s review committee, which usually includes the student’s adviser and one other faculty member. No form is required to formally designate the Plan C review committee.

- **Ph.D Degree:** By the end of the first year in the doctoral program, students will identify the three inside members of their doctoral examination committee to guide their work and critical review examination. These three FSoS faculty members will guide the student’s completion of the Critical Review Paper and evaluate the paper upon its completion. This committee will also conduct the student’s annual progress review. The student needs to complete the Designation of Departmental Committee Members (Ph.D.) form, available at http://www.cehd.umn.edu/fsos/current/forms.asp, and submit to the Graduate Student Personnel Coordinator for filing.

The three departmental committee members and one “outside” member will constitute the student’s official doctoral examination committee. To make the committee official the student will launch and submit the Assign/Update Final Oral Examination Committee form with the Graduate School [available at http://www.grad.umn.edu/students/forms/doctrinal/index.html](http://www.grad.umn.edu/students/forms/doctrinal/index.html). For most students, selecting the person who will serve as the outside member is the most difficult. Students are encouraged to work with the adviser and inside committee to select the outside member. If the student has declared a minor, then the Graduate School list of faculty for the specific minor applies: [https://apps.asr.umn.edu/faculty_roles/](https://apps.asr.umn.edu/faculty_roles/). Some minors may have additional requirements. The four-person doctoral examination committee will then conduct the Preliminary Oral Examination, Dissertation Proposal Meeting, and Final Oral Examination. Continuity of committee membership is desirable for all three steps.

Except for special circumstances, all committee members for master’s and Ph.D. graduate programs must be members of the faculty with graduate education responsibilities. The Graduate School maintains a central list of faculty with graduate education responsibilities, available at [http://grad.umn.edu/students/examiningcommitteesnew/index.html](http://grad.umn.edu/students/examiningcommitteesnew/index.html)
Assigning/Changing an Adviser and/or Committee Members

It is recognized that students’ topics may change, faculty may become unavailable, or more appropriate faculty may be available, thus necessitating a change in committee membership. Regardless of committee oversight, the student’s adviser has the ultimate responsibility for communicating with the student, monitoring the student’s progress, mentoring the student, and holding the student to department, Graduate School, and University rules.

If a student desires to change advisers or committee members, the DGS must be notified. It is the faculty’s expectation that students will work with a variety of faculty members during their graduate career. Changing an adviser or other committee member means that a better match for the completion of the degree work has been determined. Students are responsible for informing their current adviser/committee member as well as obtaining consent of the new adviser/committee member prior to notifying the DGS. To make changes in your adviser or committee members, e-mail the DGS. Request approval to change from Professor X to Professor Y and provide your rationale. Include your student ID number and the degree sought in your e-mail. The DGS must approve all changes.

The Graduate Student Personnel Coordinator submits an adviser change for a student with the Graduate School. For a committee member change, after receiving approval from the DGS, the student launches the appropriate online form, which needs to be submitted a minimum of one month before any upcoming exam. For master’s students: Assign/Update Examination Committee: http://www.grad.umn.edu/students/forms/masters/index.html. For Ph.D. students: Assign/Update Preliminary Oral Examination Committee or Assign/Update Final Oral Examination Committee: http://www.grad.umn.edu/students/forms/doctoral/index.html

Graduate Degree Plan

The official Graduate Degree Plan (GDP) is your plan of study in obtaining your degree and is considered to be a contract between the student, graduate program, and the Graduate School. The GDP form (http://grad.umn.edu/students/forms/index.html) is used for master’s and doctoral students. On the GDP you will indicate the coursework you are using to meet your graduate program’s coursework requirements as well as the Graduate School’s minimum credit requirements, including transfer coursework. The student’s adviser, DGS, and Graduate School approve the GDP form.

The Graduate School requires that two-thirds of the credits for degree programs be completed on the A-F grading system. Core courses must be taken A-F. A minimum grade point average of 3.50 (on a 4 point scale) is required by the department for a student to remain in good standing in any of its Plan A, Plan B, or Ph.D. graduate degree programs. Transfer credits from other graduate programs may be requested by petition and must be approved by the adviser and DGS.

- **When to submit the GDP:** To remain in good standing, master’s students - Plan A, Plan B, and Plan C - are to file the GDP at end of the second semester, and doctoral students are to file the GDP at the end of the third semester.

- **Departmental Procedure:** Complete the GDP online (http://grad.umn.edu/students/forms/index.html), print it, obtain your adviser’s signature, and place the form in the Graduate Student Personnel Coordinator’s mailbox along with a copy of the checklist appropriate to your degree program, available on the forms page: http://www.cehd.umn.edu/fsos/current/forms.asp. You will receive an email after the Graduate School has processed the form. Additional information can be found at the Graduate School site, Frequently Asked Questions, http://www.grad.umn.edu/students/faq/index.html#program

Course Substitutions

Course substitutions need the approval of the student’s adviser and the DGS. The Petition to Substitute a Course is available at http://www.cehd.umn.edu/fsos/current/forms.asp

Substitutions for the FSoS core classes are not allowed. The core courses offer content unique to the discipline and involve processes that make learning objectives very challenging, if not impossible, to address with course and/or independent study substitutions.

Rationale:

1. All students, especially those entering without a family background, need the unique disciplinary coursework to maintain the credibility of the FSoS degree.
2. The FSoS overall degree program design offers flexibility and choices.
3. Acceptance into the graduate program (Plan A, Plan B, and Ph.D.) assumes availability to take a full-time course load.
4. In extremely rare circumstances when events are beyond a student’s control, a student could be allowed to create a substitute learning experience for a maximum of one core course. The student and adviser should be in consultation with the faculty member who teaches the core course in question. The student and adviser should explore alternatives with the main discussion of the student’s request to be reviewed by the student’s inside examination committee members, and then be brought to the DGS for review.

MASTER’S DEGREE PROGRAMS

Family Social Science offers the master’s degree under three different plans:

- Plan A consists of 20 credits of coursework and 10 thesis research credits.
- Plan B consists of 26 credits of coursework plus a project for 4 credits.
- Plan C requires 30 graduate course credits.

The department does not offer CFT training at the master’s level.

Information about the three plans of the master’s degree can be found at the Graduate School website: http://www.grad.umn.edu/students/masters/index.html

Master’s degree students are required by the Graduate School to complete at least 60 percent of the coursework for their official degree programs as registered University of Minnesota Graduate School students. With approval of the adviser, the DGS in the major (and DGS in the minor, if the courses are for a designated minor), and the Graduate School, the transfer of up to 40 percent (8 credits for Plan A students, 10 credits for Plan B students, and 12 credits for Plan C students) of the degree program coursework from any combination of the following is permitted:

- other recognized Graduate Schools
- registration for graduate credit by non-admitted students
- registration through other University of Minnesota units in pursuit of graduate-level degrees
Master’s Degree Plan A (with thesis) Requirements

The Master’s Degree Plan A consists of a minimum 20 credits of coursework, of which at least six credits are outside the Department of Family Social Science in a supporting program; and a research thesis for 10 credits that is presented in written format, followed by an examination. The Master’s Degree Plan A is recommended for students who intend to pursue a Ph.D. degree. Graduate-level courses (or their equivalents) on the M.A. Plan A Checklist comprise the minimum requirements for the degree. This form is available at http://www.cehd.umn.edu/fsos/current/forms.asp. Students are encouraged to select additional coursework that will fit with their professional goals.

Final Steps for the Plan A

1. Your Graduate Degree Plan must be approved by the Graduate School before you can obtain your Graduation Packet and defend your thesis.

2. One semester before your Final Oral Examination:
   - Obtain the Graduation Packet from the Graduate School (160 Williamson), or request online http://www.grad.umn.edu/students/masters/index.html
   - Submit the signed Reviewers’ Report form, found in the Graduation Packet, to the Graduate School (160 Williamson) in order to obtain the Examination Report form, needed for your Final Oral Examination.
   - Submit the Graduate Application for Degree form, also in the Graduation Packet, to Graduate Student Services and Progress (GSSP), 160 Williamson Hall, or by email: gssp@umn.edu.

3. No Final Oral Examination can occur without all committee members present and paperwork available to report the outcome of the examination. It is advisable to schedule (tentatively) with your committee at least one month prior to when you plan to have your oral examination. It is the student’s responsibility to schedule a date and two hour time-block for the final oral examination with his/her committee; plan ahead because faculty members are very busy with many students at the end of the semester. The Final Oral Examination is closed to everyone except the student and the student’s committee.

   Student may elect to give a presentation of their master’s thesis work – it is an option, not a requirement. This is a joint decision between the adviser and the student. If a presentation is desired, the time and place must be scheduled with FSoS support staff. The presentation will be announced in a manner that is consistent with all department presentation announcements. It is the student’s responsibility to provide information about date, time, place, title of thesis, and committee members to the Graduate Student Personnel Coordinator and Content Strategist for the announcement.

4. After the examination, submit the Examination Report form, signed by your committee to the Graduate School (160 Williamson). The signed Examination Report form must be submitted by the last business day of the month you intend to graduate. Consult the Graduate School Degree Completion Check List Master’s Plan A website for more information: http://www.grad.umn.edu/students/masters/index.html

5. Students must deposit the thesis (http://www.grad.umn.edu/prod/groups/grad/@pub/@grad/documents/asset/udc_deposit_agreement.pdf) by the last business day of the anticipated month of graduation and apply for graduation to have a degree conferred. Degrees are conferred monthly by the University of Minnesota. A student finishing a thesis is requested to share an electronic copy with his/her adviser.
Master’s Degree Plan B (without thesis) Requirements

The Master’s Degree Plan B is available to students who wish to further their education so that they may hold positions of responsibility serving families. Although the instruction is based on research in the field, the Plan B degree is not intended to provide intensive research training.

The Plan B degree program is understood to be a terminal degree and is not recommended for students who intend to pursue the Ph.D. degree.

The Master’s Degree Plan B consists of a minimum of 26 credits of coursework, six of which are outside the Department of Family Social Science in a supporting program, and a project for four credits that is presented in written format, and an oral examination. The supporting program might represent anthropological, psychological, sociological, economic, historical, or other approaches to the study of family; or education, policy, counseling, or other applications. The graduate-level courses (or their equivalents) on the M.A. Plan B Checklist comprise the minimum requirements for the degree. This form is available at http://www.cehd.umn.edu/fsos/current/forms.asp

Final Steps for the Plan B

1. Your Graduate Degree Plan must be approved by the Graduate School before you can obtain your Graduation Packet and defend.

2. One semester before your Final Oral Examination:
   - Obtain the Graduation Packet from the Graduate School (160 Williamson), or request online at http://www.grad.umn.edu/students/masters/index.html
   - Submit the Graduate Application for Degree form, found in the Graduation Packet, to Graduate Student Services and Progress (GSSP), 160 Williamson Hall, or by email: gssp@umn.edu.

3. No examination can occur without all committee members present and paperwork available to report the outcome of the examination. It is advisable to schedule a two-hour time block with your committee at least a month prior to when you plan to have your oral. It is the student’s responsibility to schedule a date for the final examination with his/her committee. The examination is closed to everyone except the student and the student’s committee.

4. A student may elect to make a presentation of his/her master’s thesis work; it is an option, not a requirement. This is a joint decision between the adviser and the student.

   If a presentation is desired, the time and place must be cleared with FSosS support staff. The presentation will be announced in a manner that is consistent with all department presentation announcements. It is the student’s responsibility to provide information about the date, time, place, title of the thesis, and committee members to the Graduate Student Personnel Coordinator and Content Strategist for the announcement.

5. After the examination, submit the Final Examination Report /Final Report form, signed by your committee to the Graduate School (160 Williamson). The signed Final Examination Report / Final Report form must be submitted by the last business day of the month in which you intend to graduate. Consult the Graduate School Degree Completion Check List Master’s Plan B (without thesis) website for more information: http://www.grad.umn.edu/students/masters/index.html

6. Students must apply for graduation (instructions in Graduation Packet) to have a degree conferred. Degrees are conferred monthly by the University of Minnesota. A student finishing a project is requested to submit an electronic copy with his/her adviser.
Master’s Degree Plan C

Master’s Degree Plan C information provided by the University of Minnesota College of Education and Human Development for students in the Master of Education in Family Education program can be found at: http://www.cehd.umn.edu/current/graduate/advising/MEd/Handbook.pdf. Please note that this handbook includes information for students pursuing a teaching license and may not apply to all M.Ed. students in FSOS. Specific departmental information for students pursuing the M.Ed. (Master’s Plan C) in Family Education is available in the FSOS handbook and on the FSOS website: http://www.cehd.umn.edu/fsos/current/forms.asp. Department information for the Parent Education licensure and the Parent Education certificate is available on the FSOS website: http://www.cehd.umn.edu/fsos/current/forms.asp

PH.D. DEGREE REQUIREMENTS

The degree of Doctor of Philosophy is conferred in recognition of the breadth and depth of scholarly knowledge and demonstrated ability to investigate problems independently, rather than simply completing specific courses within a stated period of time. The student’s program of study must be rationally unified; that is, courses must contribute to an organized program of study and research. To attain doctoral level knowledge, a student must go far beyond coursework and credits and be committed to learning and researching independently and collaboratively, striving constantly for breadth, seeking the greatest depth of knowledge, and developing competencies in critical thinking.

A Ph.D. in Family Social Science is offered in two specialization areas: Family Science and Couple and Family Therapy. The student and the faculty adviser plan the Graduate Degree Plan (GDP) for the Ph.D. by the end of the third semester of study. Students admitted to the Couple and Family Therapy program will need the approval of the Couple and Family Therapy Program Director prior to receiving approval from the DGS.

The Ph.D. program consists of major/core requirements, a family science specialization, statistics coursework, directed research, and dissertation credits. Students in the Couple and Family Therapy specialization will have clinical requirements consisting of practicum and an internship in addition to their coursework and other requirements.

Additional program requirements include:
- Preliminary Written Examination (the Critical Review)
- Preliminary Oral Examination
  - Portfolio
- Final Oral Examination

Students who have not completed the basic research requirement in their master’s program will work closely with their adviser to determine the competency needs.

Couple and Family Therapy Accredited Program

The Couple and Family Therapy (CFT) program involves coursework, practicum experiences, and a supervised internship. Accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE), the program trains students to work with individuals, couples, and families, using a systemic and contextual approach. However, the mission goes beyond equipping students with Couple and Family Therapy skills. Combined with graduate study in theory, research, education, and related areas, graduates are able to be research-oriented clinicians, clinically oriented researchers, therapist educators, and clinical supervisors.
Students in the CFT program are responsible for selecting a clinical site and reporting monthly client contact and supervision hours throughout the program. Timely reporting of clinical hours is part of the student’s annual evaluation.

Students with a specialization in CFT, who have taken equivalent coursework in a clinical master’s degree program, may petition the CFT Program Director to waive course requirements. Forms for CFT students can be found at: http://www.cehd.umn.edu/fsos/current/forms.asp

Coursework

Minimum requirements for the Ph.D. degree include those courses listed in the applicable Ph.D. checklist: http://www.cehd.umn.edu/fsos/current/forms.asp. In addition:

- Students coming from other programs should work with their adviser to determine if they can petition to waive courses if they have completed equivalent courses. The Petition to Substitute/Waive Courses is available at: http://www.cehd.umn.edu/fsos/current/forms.asp
- Students can also transfer course credits from other Universities. Graduate School policies are followed: http://www.policy.umn.edu/Policies/Education/Education/GRADCREDITDEGREE.html
- Students may apply to take early thesis credits by completing the Early Thesis Credit Registration Request form: http://www.cehd.umn.edu/fsos/current/forms.asp

All students are required to register for FSoS 8200 Orientation for Family Social Science their first semester in the program.

The faculty in Family Social Science value both quantitative and qualitative approaches to research. All Ph.D. students are required to take at least two 8000 level research methods course in each. Choice of methodology depends on one’s research questions and is made in consultation with the supervising professor. At least one major project (master’s thesis, empirical publication documented in the portfolio, doctoral dissertation) must be quantitative in nature. The three-person inside examination committee is the final decision maker for the depth of the quantitative or qualitative work.

Research Practicum with Faculty Members

All doctoral students are expected to develop competencies in planning, analyzing, conducting, and reporting research by participating in one or more research projects throughout their program of graduate study. Students are encouraged to work with several faculty members during the duration of their graduate study and can receive research credits by enrolling in FSoS 8193 Directed Study or FSoS 8794 Directed Research. Consent of the specific faculty member involved is required.

Statistics Supporting Program (9 credits)

The supporting program is comprised of courses statistics/methods courses taken outside the Department of Family Social Science. Coursework for the supporting program consists of either the EdPsy 8251/8252 or EdPsy 8261/8262 stats sequence plus three additional credits of statistics coursework.
PH.D. WRITTEN AND ORAL EXAMINATIONS

Timeline for Written and Oral Preliminary Examinations and Dissertation Proposal

<table>
<thead>
<tr>
<th>Examination Type</th>
<th>Timeline details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preliminary Written Examination –</td>
<td>4th semester of doctoral program, for most Ph.D. students this will be spring of</td>
</tr>
<tr>
<td>Critical Review</td>
<td>their second year</td>
</tr>
<tr>
<td>Preliminary Oral Examination</td>
<td>5th semester of doctoral program, for most Ph.D. students this will be fall of</td>
</tr>
<tr>
<td></td>
<td>their third year</td>
</tr>
<tr>
<td>Dissertation Proposal</td>
<td>6th semester of doctoral program, for most Ph.D. students this will be spring of</td>
</tr>
<tr>
<td></td>
<td>their third year</td>
</tr>
<tr>
<td>Note:</td>
<td>To be competitive for dissertation funding students will want a strong dissertation</td>
</tr>
<tr>
<td></td>
<td>plan early in the spring semester.</td>
</tr>
</tbody>
</table>

While most students will be on a traditional academic year plan, there are special circumstances such as a leave of absence that can alter their timing. For example, if a student were to take a leave of absence in fall semester of their second year, spring semester would count as their 3rd semester in the program.

Preliminary Written Examination: Critical Review Paper

All doctoral students are required to pass a written examination in the major field. The preliminary written examination in FSoS is the Critical Review Paper.

Students will write the Critical Review Paper following the timeline outlined below. The purpose of the paper is for the student to provide evidence of the breadth and depth of his/her knowledge and understanding in a particular content area of family social science/studies that is of special interest. It is a measure of the student’s ability to critically analyze existing literature focusing on theoretical concepts, research methodology, and application of the findings on a specific topic. It is an exam to determine whether or not the student is prepared to continue in the Ph.D. program.

Students will choose the content area and complete an extensive review of the body of literature. The review will include theory, research, and practice for a decade of time or longer. Students will report in a succinct fashion the results and conclusions of these studies, articles, and books. The paper should critique the theoretical and methodological approaches, including the implicit values and assumptions, missing questions and answers, and the applications of these theories and methods in education, policy, and/or intervention. Based on the reported results and critique, students will outline the implications for research, education, policy, therapy and/or other applications in a manner that demonstrates breadth, depth, creativity, and intelligence. The paper may be background for dissertation research.

The faculty evaluating the Critical Review will be able to see the student’s ability to focus the paper appropriately, with conceptual accuracy and sophistication, methodological accuracy and sophistication, organizational coherence, precision and clarity of writing, and technical accuracy. The Critical Review needs to demonstrate a thought stream of explicit, logical linkage across theory, research, and application sections.
**Timing of the Critical Review Paper**

**Step 1: Paper must be started in the third semester of a student’s Ph.D. program.**
Doctoral students who enter the program with a master’s degree will consult first with their adviser and then with the additional members of their three-person inside FSoS examination committee prior to the end of the third semester. Students in the M.A./Ph.D. track will consult with their adviser and then with the additional members of their three-person inside FSoS examination committee prior to the end of the third semester of their doctoral program. The topic for the paper will be agreed upon through this consultative process; the Application for Critical Review Paper will be signed by all committee members and submitted to the Graduate Student Personnel Coordinator. The Application for Critical Review Paper is available at http://www.cehd.umn.edu/fsos/current/forms.asp, and should be filed before the end of a student’s third semester in the Ph.D. program.

**Step 2: Paper must be completed in the fourth semester of a student’s Ph.D. program.**
The Critical Review Paper is due no later than the last day of examinations in the fourth semester of a student’s Ph.D. program.

**Maintaining good standing in the program:** Students who complete these two steps on time will be making satisfactory progress in the program and will remain in good standing for funding considerations. Students who do not complete these two steps will move to lower priority for receiving departmental funding through teaching and research assistantships, grants, and fellowships.

**Rules for Completing the Critical Review Paper**

1. Prior to a student beginning the Critical Review Paper, s/he will meet and consult with the three-person inside FSoS examination committee about the topic, scope, delimitations, and potential references to use in writing the critical review. If the committee desires, it is acceptable to make modifications to the scope of the review or references to be used. This consultation is required.

2. The student may give one member of the committee (usually the adviser) a draft of the Critical Review prior to submitting it to the full committee for evaluation. In order to receive the most benefit from this review, the student’s “draft” should be well developed and, in the student’s opinion, ready for evaluation. Feedback on the draft is not an approval or disapproval of the project. This feedback request is required and is restricted to one committee member and one review.

3. The maximum number of pages for the Critical Review is 30 double-spaced pages (one-inch margins), excluding references and appendices. The font should be 12 point.

4. The minimum number of studies to be reviewed is 12, although the committee may vary these instructions in special circumstances. There is no maximum for studies that could be reviewed.

**Evaluation of the Critical Review Paper**

1. The student should send an electronic copy of the Critical Review Paper to the Graduate Student Personnel Coordinator by the last business day of examination week in the semester it is to be submitted.

2. The three-person inside FSoS examination committee will meet to discuss the evaluation and arrive at a shared understanding of the strengths and limitations, and whether the Critical Review Paper is satisfactory.

3. Critical Review Papers will be evaluated using the following recommendations: Pass; Revise and Resubmit (applicable for first submission only); or Fail. A decision that the paper has
Passed must have the agreement of at least two of the three-person inside FSoS examination committee members. Students who receive a Revise and Resubmit will be allowed to revise and resubmit once. Students who Fail the critical review will also be allowed to resubmit the paper once. In both cases, the revised paper is due no later than six weeks from the return of the critical review. Faculty committees may suggest coursework or areas of learning the student would need to complete prior to the second submission of the paper.

If the Critical Review Paper does not receive a pass after the original submission and one revision, the Written Qualifying Exam has been failed and the student will not be permitted to continue in the Ph.D. program.

4. After successful completion of the Critical Review, the Graduate Student Personnel Coordinator will complete the Preliminary Written Examination Report form for the Graduate School to indicate successful completion of the Preliminary Written Examination. This form must clear the Graduate School before the preliminary oral examination can be scheduled. Students need to plan ahead to allow time for processing forms (at least one week). Students schedule their Preliminary Oral Examination no later than the following semester.

Preliminary Oral Examination

This is scheduled after students have passed the Preliminary Written Exam (Critical Review Paper).

• The Preliminary Oral Examination will focus on the student’s doctoral program coursework, the Critical Review Paper, and include a preliminary Portfolio Review.

• This two-hour examination will include the student and the four members of his/her examination committee (three FSoS faculty and one faculty member from outside the department), which has been approved by the Graduate School. The Assign/Update Preliminary Oral Examination Committee form is found on the Graduate School website:
  http://www.grad.umn.edu/students/forms/doctoral/index.html

• The examination covers the major field, the minor field or supporting program, and any work fundamental to these areas, including possible plans for dissertation research. It is an opportunity for the student to clearly articulate his/her knowledge of the fields of study and the various ways of knowing, explain how his/her previous works were located in the greater literature of the field, and to identify the nature of the unique contributions. The faculty may examine on anything important in the field and on the student’s GDP to assess research readiness for focused inquiry, consistent with the policy of the Graduate School: http://www.catalogs.umn.edu/grad/general.html

• It is the responsibility of the student to schedule the Preliminary Oral Examination with the examiners (full committee) and online with the Graduate School (http://grad.umn.edu/students/prelimschedule/index.html) or in person at 160 Williamson Hall at least one week in advance. Additional information can be found in the Graduate School catalog:
  http://www.catalogs.umn.edu/grad/general.html

• After passing the Preliminary Oral Examination, the Preliminary Oral Report form is filed with the Graduate School, indicating that the Preliminary Oral Examination has been completed. After a student has successfully passed his/her Preliminary Oral Examination, the student will be prepared to start work on the Dissertation Proposal. The student is considered a “Doctoral Candidate,” or “All But Dissertation” (ABD).
DOCTORAL PORTFOLIO REQUIREMENTS

The Ph.D. is a research degree and it is expected that students will develop excellence in the skills associated with scholarship. Scholarship can be demonstrated through accomplishments in publishing and presenting research, teaching, outreach, and professional engagement. The categories in the portfolio are designed to mirror the professional activities in the discipline.

Because the portfolio serves as partial fulfillment for the doctoral degree, all students must meet the portfolio requirements. The criteria are the minimum requirements for portfolio approval but many of our students engage in scholarship, teaching, and service that exceed the minimum requirement. Only activities accomplished during your doctoral program (or your M.A./Ph.D. program) at the University of Minnesota can be included.

You must complete your portfolio and obtain approval from your committee prior to the scheduling of your final oral examination (dissertation defense) with the department. The original signed Doctoral Portfolio Requirements form should be submitted to the Graduate Student Personnel Coordinator.

Competencies and Portfolio

This document is designed to reflect the reality that students have different goals, and that faculty have different approaches to research, teaching, and mentoring. This document is designed to provide a structure with enough flexibility to allow faculty and students to focus on some areas, give less emphasis to others, and ultimately co-create the learning experiences and learning outcomes that are ideal for the student and his/her goals.

Students should begin to compile their portfolio in their first year of the program; the portfolio should be reviewed annually during the student’s progress review, and be used by the student and the student’s committee to create goals for the student and track progress toward students’ goals. A final portfolio review with the student and his/her committee should occur before the student’s Final Oral Examination (dissertation defense). A student cannot hold the Final Oral Examination until the portfolio is complete.

<tr>
<td>THEORY</td>
<td></td>
<td>a-d: two theory courses, qualitative research methods, clinical supervision, CFT forum</td>
</tr>
<tr>
<td></td>
<td>1. Describe the major epistemologies representing diverse ways of knowing.</td>
<td>e-h: demonstrated through written preliminary examinations as well as publications</td>
</tr>
<tr>
<td></td>
<td>2. Understand the concepts and assumptions of the foundational theories that undergird the development of more targeted family conceptual frameworks.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3. Compare and contrast the primary conceptual frameworks and theories of family science (this includes C/MFT theories).</td>
<td></td>
</tr>
<tr>
<td></td>
<td>4. Integrate applicable constructs and assumptions from family conceptual frameworks with empirical analyses based on selected research questions.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>5. Demonstrate the ability to write research questions reflecting the major constructs and assumptions of the primary family science conceptual frameworks and theories.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>6. Demonstrate the ability to critically review theoretical applications and integration of theory with empirical analyses of family science literature.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>7. Demonstrate conceptual precision in both concept definition and assumption application of family theories grounding student’s research.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>8. Demonstrate the ability to connect theory and application.</td>
<td></td>

<tr>
<td><strong>RESEARCH</strong></td>
<td>Students must complete all of the following:</td>
<td>Directed research, two qualitative methods courses, two quantitative methods courses, statistics courses</td>
</tr>
<tr>
<td>1. Know research methods applying to family social science</td>
<td>1. Develop a statement of research interest and approach.</td>
<td>Demonstrated through written preliminary exams, dissertation, as well as publications required for portfolio</td>
</tr>
<tr>
<td>a) Identify methodological issues relevant to family research.</td>
<td>2. Submit at least 2 peer-reviewed publications (at least 1 first-author). At least one must be empirical. No more than one of these publications can be purely theoretical. Articles should be published or in press by the dissertation defense unless another arrangement is made with the committee.</td>
<td></td>
</tr>
<tr>
<td>i. Family shared variance and nested data methods</td>
<td>3. Complete at least 2 peer-reviewed scholarly presentations. Presentations should be completed before the final portfolio review.</td>
<td></td>
</tr>
<tr>
<td>ii. Understand use of both family and individual level data sets and person/family centered approaches to data analysis.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Identify research designs for basic and prevention/intervention research studies.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>a) Demonstrate knowledge of qualitative methods (e.g., phenomenology, ethnography, focus groups) relevant to studying families and individuals within contexts.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b) Demonstrate knowledge of quantitative methods and analyses (e.g., HLM, SEM) relevant to studying families and individuals within contexts.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. Describe, apply, and critically evaluate the literature and the conceptual frameworks or theories specific to the student’s area of interest.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. Describe, apply, and critically evaluate methods that apply to the student’s program of research.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. Demonstrate effective research dissemination through publications in peer-reviewed journals and presentations at peer-reviewed conferences.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. Demonstrate the ability to effectively utilize technological advances to facilitate research.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>a) Understand technological tools for data collection, intervention, data management, and data analysis.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>i. Demonstrate competence with online survey tools (e.g., Qualtrics, RedCap).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ii. Demonstrate competence with data management and data analyses programs (e.g., NVIVO, SPSS, Mplus, STATA, Lisrel).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>iii. Demonstrate competence with data storage and computing technologies (e.g., Cloud Computing).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. Demonstrate the capacity to conduct, coordinate, or take leadership in a research study.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>a) Actively participate in research studies as a team member, leader, or investigator/principal investigator.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b) Understand and comply with human subjects and ethical issues related to family research.</td>
<td></td>
<td></td>
</tr>

</tbody>
</table>
| PROFESSIONAL SERVICE & LEADERSHIP | 1. Join scholarly organizations relevant to families (e.g., AAMFT, AFCPE, NCFR, SPR, GSA, SRCD) and the student’s area of interest.  
   a) Participate in early career sections of organizations relevant to specialization.  
   b) Participate in leadership positions or volunteer with a professional organization.  
2. Participate in scholarly peer review.  
3. Participate in leadership and volunteer opportunities at the departmental, University, or institutional level. | Students must complete all of the following:  
1. Develop a statement of professional identity.  
2. Join/be an active member of at least one scholarly organization.  
3. Demonstrate professional service and leadership through at least two of the following:  
   a. Participate in early career sections and leadership positions with a professional organization.  
   b. Review journal articles for scholarly publication or conference presentation abstracts.  
   c. Service to the department, college, or University. This could include participating in the FSoSS graduate student group (Shark). | Orientation seminar, advising, directed research  
Demonstrated through leadership positions in organizations, being asked to serve on committees or review articles or proposals. |
Dissertation Preparation

After completion of the Preliminary Oral Examination, the student is to prepare a research proposal for the Dissertation Proposal Meeting. Prior to the meeting, a student launches an online request to Assign/Update Final Oral Examination Committee (http://grad.umn.edu/students/assigndocfinalcommittee/index.html) so that all members of the student’s final oral examination committee are present at the meeting.

The purpose of the Dissertation Proposal Meeting is to examine the feasibility of the study design and the supporting theoretical ideas and to revise them as needed. The student will present a detailed overview of the study. The meeting concludes with the agreement of all four committee members that the proposal is acceptable or unacceptable for initiation. The FSoS Completion of Dissertation Prospectus Meeting form is signed by all committee members when the student is ready to proceed with the dissertation. In a case where the proposal is not acceptable to the committee, the student would need to revise it and then obtain the adviser’s approval before resubmitting to the committee. The committee needs to reconvene in order for all persons to receive the same information simultaneously and to make a decision. At the end of the proposal meeting, everyone should be in agreement about the depth and content of the dissertation. Once the proposal is approved, Human Subjects (IRB) approval will be required prior to initiation of data collection and/or use of secondary data.

Dissertation Format Options

The graduate faculty adopted a policy that allows students two options for the dissertation format. In addition to the traditional volume-length dissertation, students may negotiate with their committee for multiple (minimum of two) journal articles. Suggested procedural details follow. However, students, advisers, and committees are free to work out the specific details for each dissertation, within the overall spirit and the general guidelines of this policy.

- The Dissertation Proposal consists of an introduction, literature review, conceptual framework, and detailed methodology for the proposed study.

- After discussing the dissertation format with the adviser, the student will write a letter specifying the desired format for the dissertation (traditional or journal articles). This letter will be sent to the student’s official Preliminary Oral Examination committee along with the Dissertation Proposal.
  
  The committee will approve or modify the format request at the Dissertation Proposal Meeting. If the student is proposing journal articles, then s/he should also propose appropriate journals whose format (length/style) will be used for the dissertation.

- If the journal format is selected, then the final dissertation submitted to the committee and eventually to the Graduate School must also include:
  - a revised dissertation proposal which includes any changes required by the committee after the Preliminary Oral Examination along with a revision of the methodology section to describe the procedures actually used
  - committee members may ask to examine tables and other information for which there is not
space in the journal articles, and the student may be asked to include appendices that archive methodological details, data analyses, data, and other information that would flesh out the research for a reader who wants more than an article would provide. An example might be including the coding manual in an appendix. Ideally, recommendations about appendices should be made at the Dissertation Proposal Meeting so that the student can prepare them in advance of the Final Oral Examination; however, the committee may also request supplemental appendices be added after the Final Oral Examination.

**Ready to Defend Dissertation**

All members of the Final Oral Examination committee read the dissertation, although only those designated as reviewers sign the report form certifying that the dissertation is ready for defense. Certification of the dissertation as ready for defense is a necessary step toward the Final Oral Examination, but in no way diminishes the significance of that examination. The student works with the adviser to determine when to deliver the dissertation to reviewers and all other members of the Final Oral Examination committee.

To allow faculty to allocate sufficient time to read the dissertation and decide whether it is ready for defense, students must notify their adviser and other members of the Final Oral Examination committee at least six weeks in advance of the date of their proposed Final Oral Exam. This allows readers time to read the dissertation and students time to make any changes prior to defense.

**Scheduling the Final Oral Examination**

- The portfolio must be completed and approved before the dissertation defense can be scheduled with the department. The original signed *Doctoral Portfolio Requirements* form should be turned in to the Graduate Student Personnel Coordinator.

- Request a *Graduation Packet*: http://www.grad.umn.edu/students/doctoral/ The *Graduation Packet* will include the *Graduate Application for Degree* form and *Reviewers’ Report* form. You can request it in person or online up to one semester before your doctoral final exam.

- The student must schedule the Final Oral Examination as soon as a date is set but no later than one week before the examination with both the committee and the Graduate School. Final oral examination scheduling is available at http://grad.umn.edu/students/forms/doctoral/index.html. The process of scheduling the Final Oral Examination triggers the *Final Oral Examination Report* form to be sent to the chair of the examination committee.

- The “chair,” a member of the Final Oral Examination committee other than the adviser, is chosen by the student and approved by the Graduate School. The chair conducts the Final Oral Examination and informs the student of the outcome immediately after the examination session.

- The *Reviewer’s Report* form must be submitted to the Graduate School, 160 Williamson Hall, at least one week before the final defense. The *Graduate Application for Degree* form must be submitted to Graduate Student Services and Progress (GSSP), 160 Williamson Hall, or by email: gssp@umn.edu by the first business day of the month the student intends to graduate.

- Students should reserve a room for their exam (McNeal Hall 278, 375, or 398). To reserve McNeal Hall 274, contact the Department of Design, Housing, and Apparel at 612-624-1240.

- Students email the Graduate Student Personnel Coordinator and the Content Strategist with the date, time, location, title of the dissertation, and names of the Chair and committee members for the official announcement of the defense.
Final Oral Examination

- The Final Oral Examination covers the defense of the doctoral dissertation as well as other aspects of the student’s knowledge in the field of family social science.

- Prior to scheduling the Final Oral Examination, the three committee members approved by the Graduate School as “readers” must review the draft dissertation and sign the Reviewer’s Report form (available in the Graduation Packet) indicating that it is “ready for defense.” This form must be returned to the Graduate School before clearance to hold the Final Oral Examination is granted.

- Students are responsible for being aware of the various deadlines associated with this final process, including the Graduate School’s policies about dissertation credits and about the time between advancing to doctoral candidacy and taking the Final Oral Examination. Additional information about steps to completion can be found at http://www.grad.umn.edu/students/doctoral/index.html

- All committee members must be present at the examination (either physically or via telecommuting); the absence of any member results in an invalid examination.

- The Final Oral Examination in the Department of Family Social Science begins with a formal presentation of the dissertation in a public forum to which all faculty, staff, and graduate students in the department are invited. The chair of the examination committee will introduce the student and topic as well as close the seminar. The student presents for approximately 40 minutes, leaving time for questions from the guests at the presentation. No committee member can ask questions during the open-quesiton portion of the presentation.

- Following the formal presentation, the candidate meets with his/her final oral examination committee; the meeting is closed to all others.

Finishing Degree

If the student has clearly passed or clearly failed the examination and all members have signed the Final Examination Report form, the report form must be returned to the Graduate School no later than the first workday following the examination. The student is responsible for making any and all corrections requested by the committee to the dissertation. Current information about preparing and submitting the doctoral dissertation can be found at http://www.grad.umn.edu/students/doctoral/index.html

It is the student’s responsibility to submit the completed dissertation/project and ensure that all remaining degree requirements are met by the last working day of the month s/he intends to graduate [see Graduation Instructions sheet, included in the Graduation Packet]. Degrees are conferred monthly by the University of Minnesota. A student is requested to share an electronic copy of the completed dissertation with the adviser.

Consult the Graduate School website for the Ph.D. Degree Completion Checklist: http://www.grad.umn.edu/students/doctoral/index.html
GRADUATION COMMENCEMENT CEREMONY PARTICIPATION

The Department of Family Social Science encourages all graduate students to participate in the college commencement and celebrate the accomplishment of receiving a degree. Commencement exercises for graduate students are held at the end of spring semester. In March/April, the college will send an email directing students to sign up for participation in commencement. The sign-up triggers a workflow approval request to the student’s adviser and DGS.

FSoS Requirements for Participating in Commencement Ceremony

Students should not participate in the commencement ceremony until they have successfully defended their thesis (Master’s Plan A) / submitted their final project (Master’s Plan B) / passed their oral exam (Master’s Plan C) or successfully defended their dissertation. In addition, at the time of commencement sign-up, for students who have not already had their Final Oral Examination, the adviser must attest that the student’s likelihood of successfully completing the Final Oral Examination or project before commencement is very high. The adviser decides whether a student who has not yet passed may participate in commencement.

EVALUATION OF STUDENTS

Master’s Plan A and B, and Ph.D.

Students provide their committee with three documents as part of the annual evaluation process. Following the review, students receive written feedback from their adviser.

1. Progress Review Graduate Student Report Sheet:
   http://www.cehd.umn.edu/fsos/current/forms.asp

2. The FSoS checklist appropriate for the student’s degree program:
   http://www.cehd.umn.edu/fsos/current/forms.asp

3. A resume/vita with the following information:
   - Honors and Awards
   - Paper/Poster Presentations at Professional Conferences
   - Exhibitions
   - Publications
   - Community Engagement
   - U of M Appointments
   - Other invited Presentations
   - Experience Abroad
   - Portfolio for PhD students

First Year Graduate Students: First year students are evaluated by the full graduate faculty toward the end of spring semester of their first year. At least two weeks prior to the April or May graduate faculty meeting at which first year students will be evaluated, a first year student will provide her or his adviser with the evaluation documents.
**Subsequent Progress Reviews**: Following the first year review, all graduate students are evaluated annually by their inside FSoS examination committee. The purpose of the evaluation is to review students’ progress in the program and to assess strengths, challenges, and concerns.

**Master’s Plan C, Parent Education Teacher Licensure, and Parent Education Certificate**

Masters Plan C (M.Ed.), parent education teacher license and parent education certificate students are required to submit materials annually for review. Reviews of first year and subsequent year students are conducted by the student’s adviser. Materials must be submitted no later than May 1. Following the review students not making good progress (GPA <2.8) will be contacted by their advisers for follow-up meetings. However, active students or advisers may request a meeting to review goals and progress. Complete information about the review process and instructions for how to complete and upload materials for review are located in the *Family Education Program Manual*: http://www.cehd.umn.edu/fsos/current/forms.asp

**GRADUATE TEACHING INTERNSHIP**

The University of Minnesota has a strong interest in the preparation of graduate students for teaching in the undergraduate curriculum. The Department of Family Social Science offers structured, supervised teaching opportunities to graduate students who will be educating FSoS students of the future. The overall objective is to provide students with the theory, research, and practice foundations needed for future roles as college teachers and family life educators. To be eligible a student must complete the **Preparing Future Faculty Program (PFF)**.

The PFF is offered by the Graduate School, providing a teaching and learning forum in which participants engage with a multidisciplinary, cross-cultural mix of doctoral candidates and post-doctoral fellows. Participants discuss learning theory and strategies, develop teaching skills, create classroom and job search materials, and work with faculty from a range of institutional types. To receive a letter of recognition and certificate of program participation, students complete two core courses: **GRAD 8101** and **GRAD 8200: Practicum for Future Faculty**. Students may also register for topics courses offered under the **GRAD 8200** designation. For more information: http://www1.umn.edu/ohr/teachlearn/graduate/pff/

Graduate students who have completed the PFF sequence may teach selected undergraduate courses, subject to student demand and scheduling priorities. Most of these courses are graduate student designed special topic courses for advanced undergraduates during the summer school term. There will be an announcement with a call for proposals. Students must have completed the PFF sequence to be eligible.

**INTERNATIONAL STUDENTS**

The Department of Family Social Science welcomes international students from all over the world. **International Student and Scholar Services (ISSS)** is part of the Office of International Programs. ISSS located at 190 Hubert H. Humphrey Center, serves the University’s international community. Information about ISSS is available at http://www.isss.umn.edu/
T.A. English Language Requirement

The TOEFL, MELAB, or IELTS is generally required of all applicants whose native language is not English, regardless of U.S. citizenship status. The operational standards for admission to the University of Minnesota are listed as follows:

- Official scores will be required prior to enrollment or before the Graduate School can issue visa documents. All English language test scores are valid for two years from the date the test was taken.

- Applicants who have completed 24 quarter credits/16 semester credits (within the past 24 months) in residence as a full-time student at a recognized institution of higher learning in the United States or other English-speaking country before entering the University of Minnesota are generally exempt from this requirement.

Information about the TOEFL, MELAB, IELTS – English language assessment tests is available at, http://www.policy.umn.edu/Policies/hr/Performance/Language.html

FINANCIAL SUPPORT

Financing Graduate Education

Teaching assistantships, research assistantships, fellowships, and loans provide the most common forms of support for graduate students. Information about financing graduate education is available at http://www.grad.umn.edu/admissions/funding/index.html

Students may find campus-wide assistantships through the Graduate Assistantship Employment Services (http://www1.umn.edu/ohr/gae/) located at 545 West Bank Office Building, 1300 South 2nd Street, Minneapolis, MN 55454.

Research and Teaching Assistantships

1. Work hours and expectations
   - Responsibilities: Research and teaching assistantships provide important financial benefits and work experiences for graduate students, but they also involve a commitment of time and energy. Assistantships are an employment contract. Work varies with each research project or class. As with any job, there are responsibilities to the faculty member who is your employer and there are work deadlines that must be met. Sometimes the demands of the job take priority over other activities. Students who decide to accept an assistantship are also deciding to make a commitment to the particular job for which they have been hired. The student is responsible for providing the supervisor with a copy of his/her schedule, including class times as well as work times. The employment contract begins before classes start and ends after examinations are completed. Students are required to be on the job for the entire time of the contract. Each student must have an employment discussion with his/her faculty supervisor at the beginning of the semester so that everyone understands what is expected.

   - Hours: A 50% research or teaching assistantship requires 20 hours of work per week for the semester. A 25% assistant works 10 hours per week for the semester. The student receives a stipend. Assistantships are available to students who are in good standing and making excellent progress in the program.
2. Tuition

- A student holding a graduate assistant appointment of at least 25% (10 hours per week) for the entire semester will receive a tuition remission (based on resident tuition rates, regardless of residency) equal to twice the percentage of your appointment in the term of the appointment only. If you hold an appointment of 50 percent or more for an entire term, you will receive a 100 percent tuition remission. The tuition benefit the student receives is charged to the department and/or grant funding.

- Former graduate assistants, who have completed two semesters of a graduate assistantship at 195 work hours per semester, and their immediate family members (spouse, children, or legal ward living in the household) may be eligible to receive resident tuition rate reductions for up to four semesters, based on the number of qualifying GA appointments.

3. Registration

- All students who hold assistantships must register for at least six credits to maintain full-time status and may register for up to 14 credits without paying additional tuition.

4. Health Insurance

- Medical and dental insurance: The Graduate Assistant Health Plan [http://www.shb.umn.edu/twincities/graduate-assistants/index.htm] through the Office of Student Health Benefits provides medical and dental coverage to eligible Graduate Assistants working 195 hours during the official semester payroll dates. For example, the University pays 47.5 percent for a student with a 25 percent appointment and 95 percent is paid for a student with a 50 percent appointment. For more information on graduate assistant employment benefits refer to Employment Benefits: [http://www1.umn.edu/ohr/gae/](http://www1.umn.edu/ohr/gae/)

- Reciprocity: A student who is a resident of Wisconsin, North Dakota, South Dakota, or Manitoba, may qualify for reciprocity. What the student pays depends upon the student’s state of residence and the program to which the student is admitted: [http://onestop.umn.edu/finances/costs_and_tuition/](http://onestop.umn.edu/finances/costs_and_tuition/)

- **Graduate School Fellowship Office**

Graduate fellowships, awards based on academic merit, are available to new and currently enrolled graduate students at the University of Minnesota. The Graduate School Fellowship Office administers University-wide fellowships. Applications may be obtained from the Fellowship Office or may be filled out online, printed, and sent to the Fellowship Office by the designated deadline. The Fellowship Office also administers the National Science Foundation program and the Fulbright program. Additional information is available at [http://www.grad.umn.edu/fellowships/](http://www.grad.umn.edu/fellowships/)

**Departmental Fellowship Funds**

Several fellowships are available through the department on a competitive basis. These fellowships are announced each spring depending upon availability; not all fellowships are offered every year. A faculty committee selects award recipients. Information about FSoS fellowship opportunities is available at [http://www.cehd.umn.edu/fsos/current/funding.asp](http://www.cehd.umn.edu/fsos/current/funding.asp)

**Outside Employment**

Graduate experiences will be optimized when students can participate fully in the many informal opportunities for interaction among faculty and graduate students, including research projects,
practicum, independent study, and small group seminars. Students are encouraged to participate in the program on a full-time basis. The department attempts to provide financial support for students in the form of teaching and research assistantships, or fellowships. Part-time outside employment is occasionally necessary for graduate students.

**Graduate Student Travel Fund**

1. **Ruth E. Hall Fund for Graduate Student Professional Development**: Gift money from Department of Family Social Science alumni, faculty, and friends is allocated in the amount of $400 for out-of-state travel and up to $600 for travel to international professional conferences to support graduate students who present scholarship and/or have major roles in a conference.

   The *Ruth E. Hall application* can be found at http://www.cehd.umn.edu/fsos/current/forms.asp. Attach documentation (e.g., letter of invitation, program with name listed) and apply for funds no later than four weeks prior to international travel and no later than two weeks prior to domestic travel.

   Students traveling outside the U.S. are also required to register with the Global Programs & Strategy (GPS) Alliance office: http://global.umn.edu/travel/registration/index.html. Submit copies of your University-approved international travel, health, and security insurance, and the *Student Release and Waiver* form along with your *Ruth E. Hall application*.

   After students graduate, they will be encouraged to contribute to the *Ruth E. Hall fund* for future student support; this fund is built on reciprocity. Students are not limited in the number of times they may apply for these funds.

2. **GradSEHD**: Students may apply for a travel grant from GradSEHD. Applicants are eligible for one travel grant per year. Applications must be received in the GradSEHD office approximately two months prior to travel dates. See the website for application instructions: http://www.cehd.umn.edu/gradsehd/Grants/travel.html

3. **Neubeck/Maddock Scholarship**: The award is to be presented to a student who is giving a paper, who is a recipient of an award, or who is meeting some other professional responsibility at NCFR or other organization appropriate to the content of family social science. At least two grants of up to $600 may be awarded to FSoS graduate students working towards a master’s or doctoral degree. The department sends out an announcement in September when applications are due. More information is available at http://www.cehd.umn.edu/fsos/current/funding.asp

4. **COGS Travel Fund**: The Council of Graduate Students (COGS) gives awards to Master’s and Ph.D. students for travel to conferences and educational programs: http://www.cogs.umn.edu/awards.html
ADDITIONAL GRADUATE PROGRAM PRACTICES AND POLICIES

Student Representation

Students interested in serving as a student representative at faculty meetings are encouraged to volunteer. Advantages include developing an understanding of departmental concerns, getting to know faculty members, and learning about the University at large. Each cohort is invited to have a representative at graduate faculty meetings.

Students may also serve as a representative on the Council of Graduate Students (COGS), the official student college council representing graduate students on the Twin Cities campus. See http://www.cogs.umn.edu/ for more information.

Students are also encouraged to become involved in student activities within the College of Education and Human Development.

Registration

ALL Graduate School students are required to register in the Graduate School every fall and spring term until they graduate in order to maintain active status.

Maintaining active status is required in order to participate in the University community as a Graduate School student. Participating in the University community includes registering for coursework, taking examinations, submitting milestone forms, and filing for graduation. Students not registered every fall and spring term are considered to have withdrawn; their Graduate School records are deactivated. Those who wish to resume graduate work must reapply and be readmitted to reactivate their status. Information about maintaining active status is available at http://www.grad.umn.edu/students/registration/activestatus/index.html

Leave of Absence and Reinstatement from a Leave

If a student has a family or medical emergency/situation which does not permit him/her to work toward completion, a student may apply for a Leave of Absence (LOA); limit is four semesters. LOA needs adviser, DGS, and college approval. LOA policy and forms: http://www.policy.umn.edu/Policies/Education/Education/GRADSTUDENTLEAVE.html

Registering for Grad 999

Grad 999 is a zero-credit, zero-tuition, non-graded registration option for those graduate students who must register solely to meet the Graduate School’s registration requirements. Except under unusual circumstances, the department limits registration to those graduate students who have completed all their coursework and thesis/dissertation credits, but need to register to maintain active status (voted and approved by the FSoS faculty on November 17, 2008). Ph.D. students may register twice and master’s students once without prior permission of the DGS.
Basic Computer Competencies

The graduate faculty expect that all graduate students have basic computer competencies, including word processing, information retrieval, communication, knowledge of statistical package (SPSS and/or other software).

These skills may be attained in many ways. The research and statistical skills are taught formally in FSoS classes at the 5000 and 8000 levels, and through classes in departments such as Educational Psychology and Sociology. Computer skills may be attained through workshops offered every semester by the University’s computing offices and by using various manuals available through the department. Questions about these skills should be directed to the departmental Information Technology Coordinator.

EQUAL OPPORTUNITY STATEMENT

The University of Minnesota shall provide equal access to and opportunity in its programs, facilities, and employment without regard to race, color, creed, religion, national origin, gender, age, marital status, disability, public assistance status, veteran status, sexual orientation, gender identity, or gender expression.

Inquiries regarding compliance may be directed to the Director, Office of Equal Opportunity and Affirmative Action, University of Minnesota, 274 McNamara Alumni Center, 200 Oak Street S.E., Minneapolis, MN 55455, (612) 624-9547, eoaa@umn.edu. Website is https://diversity.umn.edu/eoaa/

This publication/material is available in alternative formats upon request. Please contact the Student Support Services Assistant, Department of Family Social Science, 1985 Buford Avenue, 290 McNeal Hall, St. Paul, MN 55108 or telephone: 612/625-3116.

The information in this handbook and other University catalogs, publications, or announcements is subject to change without notice. University offices can provide current information about possible changes.
