

The Women's Philanthropic Leadership Circle presents

Dr. Mary Meyer

Health Benefits for Women through Environmental Connections

Dr. Meyer will discuss how gardening and interaction with the natural world affects our health. Learn about the nurturing role environmental connections have for women. Mary is a professor in Horticultural Science at the U and will share her ideas about gardening's nurturing and creative role in our lives, as well as the importance of the environmental geography of our childhood.

Thursday, April 10, 2008, 5:00-7:00 p.m.

Conference Rooms ABC, Campus Club, Coffman Memorial Union, 4th Floor
