COURSE INFORMATION

Learning Objectives:

Select 2 to 3 things you would like to learn during your experience which are related to child development. Examples may include interaction of children among peers or with adults, attachment issues, how children communicate or learn, etc.

Methods and resources to be used (e.g. books, articles, workshops):

How will you learn the 2 to 3 learning objectives listed above? This might be readings, interview with staff, observation of children interacting, attending training meetings, etc.

Results to be evaluated:

How will the supervisor know you met your learning objectives? He or she may have a formal evaluation, complete an interview with you or do observations. Etc.
